

HYBRID SPA Technology

‘Superior Performance Delivered Economically’

Hybrid Spa Technology:

With Hybrid Spa Technology there is no need to keep your spa warm all the time. The Hybrid system will heat your spa from 20 degrees to 38 degrees in just over an hour, costing you as little as 50c in heating costs anytime you use your spa.

Coupled with our multi-speed eco-filtration system your spa will cost as little as \$3.60 per week to run.

Benefits:

- Save on heating costs
- Quick heat up times
- Reduces carbon footprint
- Reduces chemical usage

*Filtering your Spa for 8 hours 7 days a week and using your Spa twice per week
